-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **BASIS FOR REJECTIONS**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (c) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

## **REJECTION OF CLAIMS ON FORMAL MATTERS**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Failure to set forth the method and apparatus in proper idiomatic English renders the clarity of the subject matter indefinite. In this regard, the awkwardness of the phrasing does not facilitate a concise and clear description of the subject matter. As required by the second paragraph of the noted statute, the subject matter must be particularly pointed out. What constitutes the left side and the right side? With reference to claims 5 and 8, the subject matter set off in parenthesis, “(the number of roll pairs-2)”, is unclear as to how it relates to the claimed subject matter.

### **REJECTION OF CLAIMS OVER PRIOR ART**

Claims 1, 3-5, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Knudson (6,119,498). See Figures 1, 3, 4-6 and 8-12 where the node roller impacts the sheet material at spaced locations so as to bend the sheet material at each location thus bending the sheet material between the locations. For example, an embodiment in Figure 4 shows that the roller 41 has a plurality of pressure parts 44 in intervals of the width direction of the sheet material 45. Any bending of sheet metal imparts a degree of work hardening to the material. As to claims 5 and 8, compare Figures 4 and 5 where the pressure parts 44 of one roll pair 41, 46 do not overlap the pressure parts 54 of the other roll pair 51, 56.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Sprung (3,145,758). Figures 2 and 3 show rollers 11 or 14 having a plurality of pressure parts and a plurality of non-pressure parts, each part being alternately arranged. As to claim 2, it is evident that the non-contact length of the roll 11 or 14 is less than 60% of the effective length of the roll. The width of the sheet material does not define the size of the roll and its pressure and non-pressure parts.

### **INDICATION OF ALLOWABLE SUBJECT MATTER**

Claims 6 and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### **PRIOR ART CITED BY EXAMINER**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

### **RESPONSE BY APPLICANT(S)**

Applicant(s) response to be fully responsive and to provide for a clear record must specifically point out how the language of the claims patentably distinguishes them from the references, both those references applied in the objections and rejections and those references cited in view of the state of the art in accordance with 37 CFR 1.111 (a), (b) and (c).
